

To the attention of all 3-rd year students (Bulgarian and English groups), concerning elective subject Endocrinology!!!

Dear students,

First of all welcome again in the Uni!

Just to inform you that the lecture course of the elective subject Endocrinology will start the second week of the winter semester as follow:

English groups: on 17.09.2024 at 10.15h in Hall 6. (10.15 - 12.00)

Bulgarian groups: on 18.09.2024 at 16.15 h in Hall 7. (16.15 - 18.00)

The total duration of the course is 7 weeks - 9 hours lectures and 6 hours seminars/practicals.

The main topic of the course are endocrine diseases in small animals (dogs and cats): Diabetes mellitus; Hyper- and hypothyroidism, Hyperadrenocorticism (Cushing's syndrome);

Hypoadrenocorticism (Adison disease); Diabetes insipidus

The students interested in Endocrine regulation of lactation in dairy cows there will be one additional lecture, including some abnormalities related to high milk production and ketosis in particular!

The enrolment starts on 02.09.2024 in Department of Physiology in room 684 or my office 699-1!

Please share this info in you friends groups!
